## **Dice Generator**

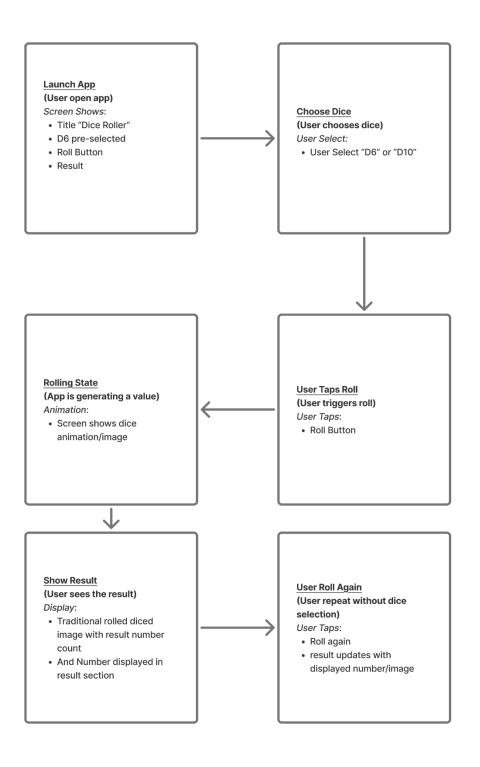

The user should be able to choose different dice, such as a D6 or a D10 (number of faces).

The user should be able to roll their chosen dice to see the random outcome.

## User Stories / functionalities

- 1. Choose dice type
  - As a player, I want to choose between a D6(6 faces dice) and a D10(10-faces dice), so that I can roll the kind of dice i need.
- 2. Roll the dice
  - As a player, I want to tap a "Roll" Button, so that I can get a random result.
- 3. See the result
  - As a player, I want to see the rolled number/sign clearly on the screen, so that I immediately know what I have rolled.
- 4. Roll again quickly
  - As a player, I want to roll again without reselecting the dice, so that I can roll multiple times faster.
- 5. Default dice
  - As a new user, I want the app to start with a default dice selected (eg. D6), so that I can roll right away without selection.
- 6. Error handling
  - As a player, I want the app to prevent rolling if no dice is selected, so that I don't get confused result.

## Storyboard

- 1. **Open App:** (User Open App)
  - Screen shows title: "Dice Roller"
  - D6 is pre-selected (highlighted)
  - Big "Roll" button
  - Result area.
- 2. **Choose Dice:** (User Choose dice)
  - Users select "D6" or "D10"
- 3. **User Taps Roll:** (User triggers the roll)
  - User tap "Roll" button
- 4. Rolling State: (App is generating a value)
  - Screen shows dice animation (Rolling... or dice icon).
- 5. **Show Result:** (User Sees the result)
  - Dice icon with count
  - Number displayed in result area
- 6. User Roll Again: (User repeat without dice selection)
  - User raps "Roll" again
  - Result updated with displayed number and dice count
